

# Aberdeen Standard Capital (Offshore) Sterling Fixed Interest Fund

## Quarterly Performance Data and Analytics to 30 June 2019

### Fund Description

The fund aims to generate a return from income and capital growth, before charges by investing mainly in Sterling denominated corporate bonds. The fund is actively managed by our investment team who may also invest a proportion of assets in other bonds (e.g. global corporate bonds, government bonds, euro and dollar denominated bonds) and/or money market instruments to try to take advantage of opportunities they have identified.

The value of investments within the fund can fall as well as rise and is not guaranteed - you may get back less than you pay in. The fund may use derivatives for the purposes of efficient portfolio management, reduction of risk or to meet its investment objective if this is permitted and appropriate. The sterling value of overseas assets held in the fund may rise and fall as a result of exchange rate fluctuations.

### Performance\*

The performance of the fund\*\* has been calculated using bid to bid basis, based on an Annual Management Charge (AMC) of 1.00%, gross income re-invested and excludes initial charges. The Comparative Index performance is on a Total Return basis.
